## A Sociological Approach to Acquired Brain Injury and Identity

By **Jonathan Harvey**, University of Southampton, UK

*Series: Interdisciplinary Disability Studies*

This path-breaking book explores the (re)construction of identity after acquired brain injury (ABI). It draws meaning from the every-day experiences of six male ABI survivors and investigates their identity (re)construction after their ABI. The experiences of the participants allow the reader to investigate neurological rehabilitation after ABI from the survivor's perspective. This book suggests that rehabilitation is often a continual process that extends beyond the medically prescribed period. It also shows that identity after ABI is often (re)constructed in an unpredictable way; a way that emphasises the importance of reciprocal support and the uncertainty of future life.
